DIARY NOTES

DD/S

12 October 1965

25X1A 1. I received a briefing by [REDACTED] Acting Director of Security, 25X1A
and [REDACTED] of the Technical Services Division on
the new security envelope pouching system mentioned in the Office of
Security Weekly Report of 4 October 1965. The envelope is still in the
initial stage of testing, and much remains to be done. I felt that it would be
premature to mention this at the Executive Committee Meeting and asked to
be informed of the development and planned use of these envelopes after the
system has been developed.

2. After the DD/S Staff Meeting I spoke to [REDACTED] about the Office 25X1A
of Computer Services' delays in meeting DD/S computer requirements,
specifically those of the Offices of Finance, Logistics, and Personnel. I
asked him to look into the problem, particularly since the 501 has broken
down twice, we have had to use an alternate computer in Baltimore to meet
the payroll on time, the 501 is operating at capacity, and we have no spare
computer in case of emergency. I told him that 501's are now selling for
between \$80,000 and \$100,000 and that I would like consideration to be given
to the purchase of another computer to serve as a spare until the end of
calendar year 1967 when the program can be converted to the IBM 360. I
also reminded Jack that the Office of Computer Services is designed to pro-
vide computer services to the entire Agency and that we expect the service
to be maintained. Jack said that he would look into the problem and the
results of the meetings between the Office of Finance and the Office of
Computer Services about the delay in Finance computer runs.
